

DSwiss AG was founded in 2008 in Zurich and is a worldwide leading provider of highly secure digital services. We offer digital safes, mailboxes for bank document delivery and secure exchange platforms for financial advisors and customers: secure, reliable and fully GDPR compliant. DSwiss meets the highest security standards for cloud solutions and boasts an impressive client portfolio of leading European banks, insurance companies and security service providers. In addition, DSwiss provides the award-winning online password and file manager SecureSafe with more than 1 Million users worldwide.

Interested in joining a strong and highly innovative team? Be given a technical role with the power to make a difference? Or drive our solutions and software to be world-class in their category? Are you an enthusiastic and good team player with initiative? If your answers are 'Yes', we are looking forward to receiving your complete application documents. We are looking immediately or upon availability for a Linux System Engineer (80-100%). You help us make our systems future-proof. Your field of work includes all layers of our infrastructure, from provisioning systems, through network equipment down to the bare hardware in the datacenter.

Linux System Engineer 80-100% (m/w)

Responsibilities & Goals

- Development work on our configuration management system
- Participation in the development lifecycle
- Operation of DSwiss and customer infrastructures
- Participation in 3rd level support including on-call duty
- Administration of the back-end systems
- Configuration management systems (Puppet, Ansible etc.) background would be considered an advantage

Your qualifications and experience

- Successfully completed higher education (ETH, University, FH) course of studies or equivalent relevant expertise
- Minimum 3 years of professional experience supported by references
- Hands-on Debian and/or Red Hat-based Linux distributions skills
- Configuration management systems (Puppet, Ansible etc.) background would be considered an advantage
- Solid proficiency in the area of storage technology, networks and server/service monitoring systems
- Experience with Java application servers and SQL would be considered a plus
- Fluency in German and English
- High level of autonomy and a problem-solver mentality and motivation

What we offer

- DSwiss is a socially competent and innovative team with open-door mentality
- Personal responsibility, independence and the possibility to create new solutions
- Develop, learn and contribute within a highly talented and experienced team
- Centrally located in Zurich, including a roof-terrace with pool
- Attractive terms and conditions, including six weeks of vacation

Ready to join our team?

We are looking forward to receiving your complete application documents via email to jobs@dswiss.com.
